**YOUR GUIDE TO MORE FUN ONLY ON**

**HD DVD** ™

**DREAMWORKS**

**SHREK THE THIRD** ™

# GET CONNECTED WITH WEB-ENABLED FEATURES

Plug into a unique online universe with Web-Enabled HD DVD. Get connected now to download exclusive fun and fresh updates directly to your HD DVD player.

## CONNECT AND BROWSE

Once your player is connected, access the Web-Enabled Features button from the Extras menu to see what new features are ready for you to download.

## GET NEW FEATURES

Download a feature and use it anytime you watch your disc. *Shrek the Third,* for example, includes Shrek trivia and character fun facts – all displayed while you watch the movie.

Web-Enabled Features may only be available in the United States. High-speed Internet connection required. Service incompatible with dial-up Internet service. When you insert your HD DVD and your player is properly connected to the Internet, we will check for and download updates that allow us to recognize your HD DVD player and disc and update the playback of your HD DVD disc. During this process, we will also collect non-personally identifiable information from your HD DVD player and disc, including, without limitation, IP address, time of day, a unique identifier assigned to your HD DVD player, and the manufacturer and model of your HD DVD player.

It is possible this HD DVD disc was manufactured after your HD DVD disc player. To ensure the best possible viewing experience, your HD DVD disc player may need a firmware or software update. Please consult your hardware manufacturer's website for the latest firmware or software version and, if an upgrade is available, it is suggested that you follow its installation instructions.

**For more information, visit hddvd.dreamworks.com**

To enjoy the Web-Enabled Features on this disc, please make sure that your player's Internet connection is properly set up. Please follow all of the steps below:

**1** Use your player's Ethernet port to connect to the Internet.

**2** Using the player's SETUP menu (not to be confused with the SETTINGS menu on the actual disc), make sure the DHCP and DNS settings are both set to ON.

**3** Make sure the player's date and time are set correctly. There are two ways to do this:

Using the player's SETUP menu, manually set the player's date and time.

**OR**

Within the player's SETUP menu, set the Network Time Protocol (NTP) to ON. *NOTE: This setting may use a different label, such as "Network Time Server" or "Automatic Time Synchronization."*

**For details on how to access these and other network settings on your player, please refer to your player's owner's manual, or visit hddvd.dreamworks.com for more information.**
