SUPERIOR PICTURE

HD DVD delivers the greatest high-definition content available today with a resolution of 1080p (2,073,600 pixels per frame). That's 6 times greater than standard DVD video with a resolution of 480p (345,600 pixels per frame)!

SUPERIOR SOUND

Dolby® Digital Plus represents the next generation of premier high-resolution home surround sound entertainment. With data rates of 1.5Mbps (compared to 448Kbps for standard DVDs), Dolby Digital Plus enables a superior surround sound listening experience that fully complements the dramatic high-definition picture quality and special features provided on this disc.

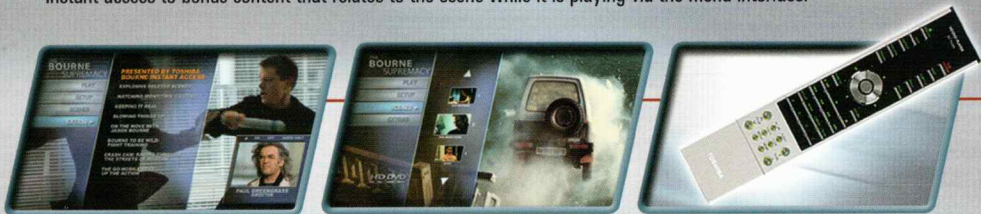

SUPERIOR INTERACTIVITY

HD DVD's dynamic interface allows you to easily access features on the disc while you watch the movie via cascading choices. The interface is created using iHD, an XML-based interactivity specification.

Going beyond standard DVD, experience a whole new level of interactivity that creates additional features including:

- Navigating in real-time to change your settings
- Multiple video streaming allowing advanced features such as Picture in Picture.
- Instant access to bonus content that relates to the scene while it is playing via the menu interface.

SUPERIOR COMPATIBILITY

Play HD DVDs, standard DVDs, and audio CDs on one HD DVD player!
